Synopsis:

This short documentary film captures the moments when we use the water fountain. It is a poetic and allegorical story about people, differences, connections, similarities. We all stop by the water fountain, even just for a moment, no matter where we come from or where we go. This is a story about all of us - young, old, happy or sad, angry or delighted, or just being thirsty. This is a story about the little moments of magic that happen there, at the fountain.
